Summary

Pre-final year B.Tech AI & Data Science student (CGPA 7.72, graduating 2027) with hands-on experience in building production-grade AI and full-stack systems. Built **Code2Day**, a competitive programming platform featuring **17,499+ problems** and **56+ production deployments**, actively used across **Ramco Institute of Technology** and later acquired by **QuBrain.ai**. Developed production AI systems at Ramco Cements with expertise in ML engineering, computer vision, DevOps, scalable backend systems, and end-to-end product development.

Technical Skills

Machine Learning & AI: YOLOv8, PyTorch, TensorFlow, Scikit-learn, ONNX Runtime, Ollama, Llama 3

Computer Vision: OpenCV, PaddleOCR, Tesseract OCR

Backend: Django, FastAPI, Flask, REST APIs

Frontend: React, Vite, PyQt5

DevOps & Infrastructure: Docker, Docker Compose, GitHub Actions, Nginx, Gunicorn, CI/CD

Databases: PostgreSQL, Redis, SQL

Tools: Git, Power BI, ReportLab, openpyxl

Experience

ML Intern — Cement Bag Counting System

Jan 2025 – Dec 2025

The Ramco Cements Limited

Ariyalur, Tamil Nadu

- Built and deployed a real-time AI-based cement bag counting system using YOLOv8, achieving **97.5% accuracy** compared to **94%** from traditional approaches.
- Handled the complete ML pipeline including dataset collection, annotation, augmentation, training, optimisation, and deployment on live factory camera feeds.
- Developed a PyQt5 dashboard for real-time inventory monitoring and automated report generation for factory operators.
- Packaged and deployed the application as a standalone executable using PyInstaller without dependency setup.

AI & ML Intern — People Counting & Security System

Apr 2024 – Jul 2024

The Ramco Cements Limited

Ariyalur, Tamil Nadu

- Developed a multi-camera real-time people counting and security monitoring system using YOLO and OpenCV for factory entry and exit tracking.
- Optimised concurrent video processing using Python multithreading for stable real-time performance across multiple feeds.
- Built a centralised PyQt5 dashboard for live monitoring, people counting, and report generation.

Data Analyst

Nov 2023 – Dec 2023

Igress Solutions

Remote

- Designed interactive Power BI dashboards for AWS sales analytics with drill-down insights across regions and products.
- Automated data cleaning and preprocessing pipelines using Python to improve reporting efficiency and dataset quality.
- Received both the **Spot Award** and **Impact Award** within the first month for delivering measurable business impact.

Projects

Code2Day | React, Django, FastAPI, PostgreSQL, Redis, Docker, Ollama, Llama 3

Jan 2026 – May 2026

code2day.ramcoad.com github.com/Cherubino0/code2day

- **Built solo as a pre-final year student → 56+ production deployments → supported 120+ concurrent users → acquired by QuBrain.ai.**
- Engineered a Docker-isolated code execution engine supporting C, C++, Java, JavaScript, Python, and SQL with secure sandboxing, automatic container cleanup, and strict CPU/memory execution limits.
- Optimised concurrent code execution and contest workloads using Redis queue management, PostgreSQL query optimisation, and scalable backend services for stable multi-user assessment performance.
- Implemented CI/CD pipelines using Docker, GitHub Actions, Nginx, PostgreSQL, and Redis for automated production deployment, rollback handling, and contest scalability.
- Integrated offline Llama 3 8B via Ollama for automated aptitude and coding question generation with structured validation pipelines.

- Built anti-cheat systems including fullscreen enforcement, tab-switch detection, clipboard blocking, and automated submission control for secure placement assessments.

Helmet & Vest Detection System | *YOLOv8, PyQt5, ESP8266, OpenCV*

2024

[LinkedIn Project Demo](#) [GitHub Repository](#)

- Developed a real-time PPE compliance detection system using YOLOv8, OpenCV, and ESP8266 for automated safety violation alerts.
- Built and optimised the computer vision pipeline including dataset preparation, training, inference optimisation, and deployment.
- Designed a PyQt5 dashboard for live monitoring of helmet and vest compliance across factory surveillance feeds.

Education

Ramco Institute of Technology

2023 – 2027

B.Tech — Artificial Intelligence & Data Science | CGPA: 7.72

Rajapalayam, Tamil Nadu

The High Range School

2022 – 2023

Higher Secondary (Class XII)

Munnar, Kerala

Achievements & Hackathons

1st Prize — National Paper Presentation

Francis Xavier Engineering College, Tirunelveli

- Won national-level paper presentation on AI-based cancer differentiation against participants from institutions across India.

Best Team Award (Team Lead) — National AI Innovate Hackathon

Shri Eashwar College of Engineering, Coimbatore

- Led team to deliver an LLM-based production-ready solution under national hackathon constraints.

Finalist — HACKODESY 2k25

Kalasalingam University, Krishnankoil

- Reached finals among hundreds of competing teams in a national-level hackathon competition.

Certifications

Introduction to Generative AI — Google Cloud

Data Analytics Essentials — Cisco

Python Essentials 1 — Cisco

Fundamentals of Facial Recognition — Microsoft

Introduction to Machine Learning — Microsoft

Complete Web & Mobile Designer: UI/UX, Figma — Udemy
